ITHACA - SKB DOUBLE GUNS

Side By Side Double Gun

MODEL 100

OVER/UNDER DOUBLE GUNS

MODEL 500

MODEL 600 - TRAP

ithaca model 49 saddlegun®

Safest gun made for the beginning shooter. Styled after the gun that won the west. America's best selling single-shot .22 rifle.

Ithaca's Model 49 Saddlegun quickly won the hearts of the nation's young shooters—earned the praise of their safety-minded parents and youth-oriented rifle training programs as well!

The Model 49 Saddlegun is an ideal combination of accuracy and safety. Its rebounding hammer is hand operated and activated independently from the lever action. This means the gun cannot be fired unless the hammer is fully cocked-by hand. This double safety factor is just one reason why the Saddlegun is perfect as a boy's first rifle.

The precision-rifled solid-steel barrel is 18" long, and overall length is 341/2". The gun is chambered for .22 short, long and long rifle cartridges.

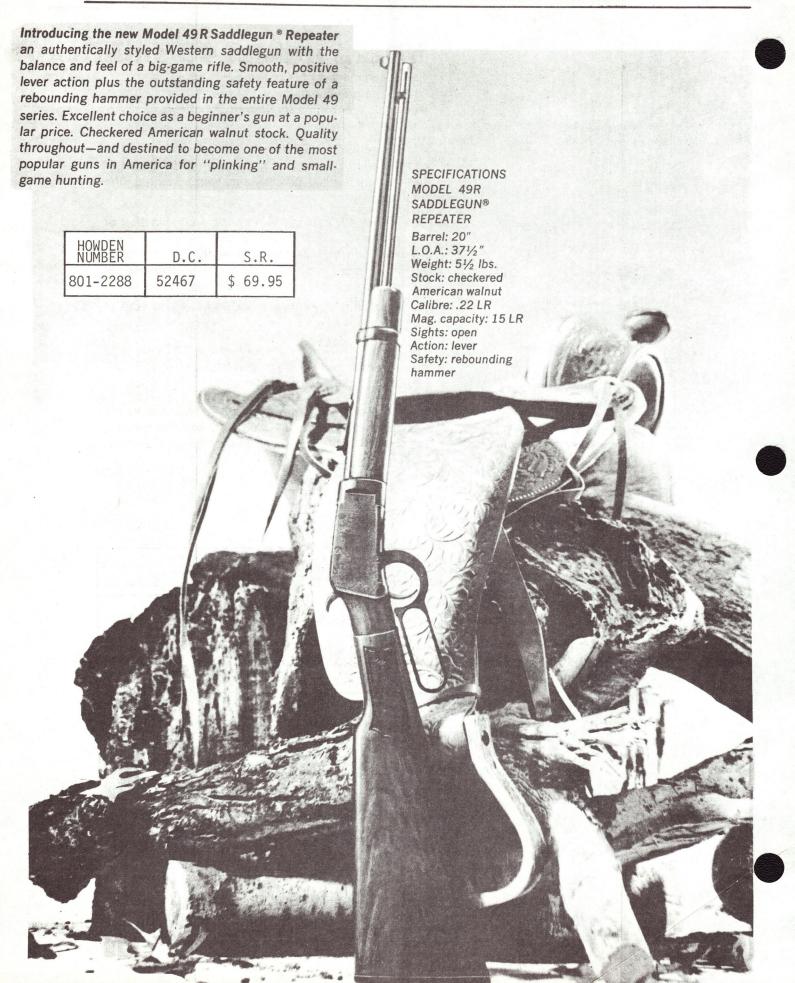

Weight is approximately 5½ lbs. Shorter stocks for smaller boys are available at no extra cost. Companion scabbard is described under Ithaca Gun Case section.

ithaca automatic shotgun models 300 and 900

Today's most outstanding value in an auto-loading shotgun, combining low initial cost with high value. Reliability has been thoroughly proven in more than six years of development and testing.

Light weight permits easy carrying and handling. Exclusive highlight finishing process used on stock and forearm of Model 900 Deluxe is applied by hand and provides the outstanding appearance long associated only with the finest grained walnut. Features positive cross-bolt safety and interchangeability of barrels. Automatic magazine cutoff permits instant change of shell loads without fully unloading magazine.

MODEL 300

An expertly balanced lightweight gun that adds to the pleasure of day-long field use. Extra-strength, accurate Roto-Forged barrel and beautifully checkered walnut stock.

MODEL 900 DELUXE

Automatic shotgun with white spacer inserts at grip cap and butt plate to set off the hand-checkered walnut stock. Attractive hunting scene on receiver is gold filled and trigger is gold plated. Gold-plated name plate is inlaid in stock.

- CHROME-LINED, ROTO-FORGE BAR-RELS—Hard chrome lining reduces shot deformation . . . prevents rusting, pitting, leading (wipes clean with dry patch). High-tensile alloy steel, pre-stressed by forging for extra strength.
- HAND CRAFTED AND FITTED—Barrels are hand-struck: draw-filed by hand to eliminate waves and dips... no thin spots. Superbly, uniformly strong. All action components chromed and fitted to minute tolerances.
- SELECTIVE SINGLE TRIGGERS—Selector conveniently located on trigger. Smooth, crisp pull, exactly the same for both barrels . . . firing is always in sequence. Most foolproof single-trigger mechanism yet devised.
- PROOF-TESTED—All guns have passed proof overload tests which greatly exceed the power of any commercial ammunition you can buy.
- HAND-CHECKERED STOCKS AND FORENDS—Beautifully finished walnut.

MODEL 66 SUPERSINGLE®

The Ithaca Model 66 SuperSingle is made in 12, 20 and .410 gauge. The 12 is the pro's all-purpose single: With 2¾ " regular load it's just right for birds and small game . . . or with 3" Magnums, it produces the reach and punch for geese and for bigger game. Lighter and younger shooters like the 'softer' recoil of the 20 and .410—both fine performers for upland birds, small game and varmints—and both are available in Standard or Youth models. Youth models have shorter stock and Anti-Recoil Pad. All three gauges have the fit, the feel of all fine Ithaca guns, and feature . . . Fast lever action for quick reloading by right- and left-handed shooters . . . Fixed pivot system for rugged extra strength, reliability, lastingly perfect alignment.

MODEL 66RS BUCKBUSTER SUPERSINGLE®

This new version of the SuperSingle has a short 22-inch barrel with cylinder bore, and is equipped with Ithaca Deerslayer® rifle-type sights. It is available in 12 and 20 gauge only, both with 3-inch chamber. Other features are the same as the regular M66 SuperSingle. This is a dandy gun for lightning-fast action on rabbit, grouse or woodcock in thick cover, and makes your point fast with quail!

Model 66 SuperSingle SPECIFICATIONS:

Single shot, lever action

Gauges: 12, 20, .410

Barrel: 12 ga. — 28" or 30" Full Choke, 28" Modified

20 ga. (Standard) — 28" Full or Modified Choke

20 ga. (Youth) — 26" Modified Choke

.410 ga. (Standard and Youth) — 26" Full Choke

Chamber length: 3" all gauges

Stock: Fine American hardwood. (Youth models have shorter stock, and are equipped with Anti-Recoil Pad)

Sight: Front — brass bead

Quick-release opening lever leaves one hand free for loading. Twoinch travel of lever keeps hand close to stock for sure control during rapid reloading.

Three-inch chamber takes either 2¾ " regulars (2½" in .410) or 3" shells. Just choose your load for the type of shooting at hand!

"Rebounding hammer" type safety operates independent of lever action. Closing of lever after loading does *not* cock gun for firing. Must be hand-cocked.

ITHACA Featherlight® Repeater Shotguns

ITHACA MODEL 37 SUPREME VENTILATED RIB GRADE REPEATER*

Lighter weight lets you travel farther, get into action quicker, finish fresher.

N 9 MODELS (INCLUDING DEERSLAYERS)—ALL FEATURING: Amazing new Ithaca RAYBAR® Front Sight. ■Quick takedown—no tools needed. ■Short lightning-fast pump action. Shells fed smoothly into chamber. ■ Easy action release for removing shells. ■ Handy cross-bolt safety—can be furnished reversed for left-handed shooter. ■ Receiver is of solid, one-piece high-quality steel for lighter weight, greater safety, lifetime endurance.
■ Bottom ejection—protects shooter's face and arm and the man along-side from burned powder residue—gas blow-back. It's the safest shotgun for the left-handed shooter. Rain, sleet, snow or dirt cannot clog action. ■ Full pistol grip. ■ Five-shot capacity: Three-shot Migratory Bird plug supplied. ■ Waterfowl scene on one side of receiver shows three ducks in natural setting. Scene on other side features a bird dog with two rising Ringneck Pheasants.

*ITHACA SUPREME VENTILATED RIB GRADE REPEATER Model 37 Supreme

NOTE: All stock dimensions may vary slightly due to hand sanding.

MODEL 37R

Only pump gun on the market today that has a solid raised rib. Adds strength to barrel and gives perfect sighting plane for instant alignment.

Beautiful fine-line checkering on stock. Extras and Specials same as those available for Model 37.

ITHACA Deerslayer Two Guns in One

THE MODEL 37 DEERSLAYER is a special member of the Ithaca Featherlight series. It is the perfect 'combination' gun for rabbit, quail, pheasant, grouse, doves, woodcock, etc. By merely changing ammunition to rifled slugs, it is ideal for deer, bear, wild boar, woodchucks, etc. It possesses all the outstanding features of other Featherlight Repeaters, such as lighter weight, bottom ejection, one-piece receiver (Pg. 2).

In Addition, it contains the following features, carefully crafted to provide the hunter with the best for two principal types of hunting:

SUPER-ACCURATE BARREL—Bored especially for today's factory-loaded rifled slugs. It is factory-sighted for 40 yards. At this range, two-inch five-shot groups are common—and nine-inch groups at 100 yards. Barrel lug is tapped for sling swivel. Swivels are furnished fore and aft with all guns.

HANDLES SHOT LOADS WELL up to 35 yards, giving an open-type pattern that's just right for small game and fast-rising birds. Five-shot capacity: Three-shot Migratory Bird plug supplied.

SUPER-ACCURATE SIGHTING—Ithaca's exclusive RAYBAR® Rifle-Type Front Sight gathers light rays for fast, hair-splitting aim. Extra black sight is furnished also for conditions where you prefer a black sight—snaps in, snaps out. "V" type sporting rear sight is adjustable for elevation. Both front and rear sights are fitted to barrel

DEERSLAYER BARREL FOR YOUR PRESENT ITHACA REPEATER:

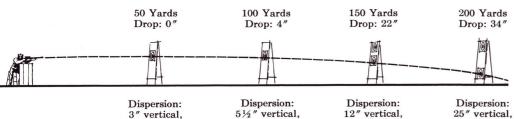

No factory fitting necessary for Ithaca Repeaters with serial numbers over 855,000. For Ithaca Repeaters with serial numbers <u>under</u> 855,000, entire gun needed at factory.

2" horizontal

CHOICE OF BARREL LENGTHS: All Deerslayer models are available with either 26" standard barrel or 20" carbine barrel. No difference in price.

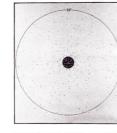

STOCK SPECIFICATIONS for all three models: Drop at comb 1¾"; drop at heel 2¾"; stock length 14".

RIFLED SLUG AMMUNITION'S DROP and TRAJECTORY

51/2" vertical 31/4" horizontal

12" vertical,

DEERSLAYER SHOT PATTERN Typical target shot at 30 yards with same Ithaca DEERSLAYER that produced slug groups in bench test (Pg. 5). Ammunition was 3 drams equivalent — $1\frac{1}{8}$ oz. — $\pm 7\frac{1}{2}$ shot.

- World's most accurate slug-shooting shotgun
- Ideal with regular shot-shell loads for upland birds, small game and skeet

an improvised bench rest (1). The gun was a Model 37 Standard DEERSLAYER 12 gauge with 20-inch

on stock. Standard Deerslayer comes without 'scope or mount, but with rear sight ramp grooved for the Redfield 'Scope Mount. Furnished with Leupold M8-2X two-power 'scope

MODEL 37 DELUXE DEERSLAYER

12, 16 or 20 gauge; 26-inch regular or 20-inch carbine barrel length. Finger-grooved beavertail forearm, beautiful fine-line checkering on stock. Pistol-grip cap, Ithaca Anti-Recoil Pad. Rear sight ramp grooved for Redfield 'Scope Mount.

*MODEL 37 SUPER DELUXE DEERSLAYER

Same as Model 37 Deluxe plus receiver peep sight, Ithaca Anti-Recoil Pad, and leather sling. 12, 16 or 20 gauge; 26-inch regular or 20-inch carbine barrel length. Rear sight ramp grooved for Redfield 'Scope Mount.

(This gun is shown at top of page.)

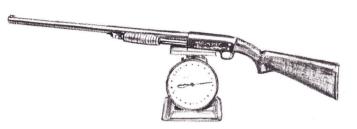

A 13/4-inch group of 5 slugs at 40 vards with DEERSLAYER.

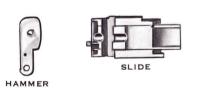

Bulls-eye is only six inches in diameter; total target only 12 inches in diameter. "Halfhole" at "3 o'clock" is from slug that bounced back through the target from back stop. Whole target area is size of vital killing area of average deer.

ITHACA

Here's why you can travel farther, get on point faster and smoother, and finish fresher with a FEATHERLIGHT: The 20 gauge weighs only 5¾ pounds! Other gauges are comparably light.

BREECH BLOCK

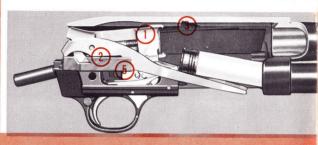

BARREL

THE ITHACA COMPONENTS SHOWN HERE are neither castings nor stampings. The barrel is forged from a billet of special steel. The trigger plate is accurately machined from a high-strength steel forging. The others are precisely machined from solid billets of high-grade steel.

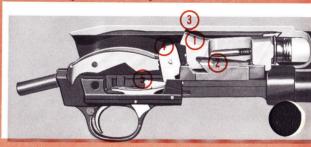

These, or similar parts, are the critical components of any shotgun. It is the mark of an Ithaca that they are made in the one way that insures lifetime strength, safety, accuracy, durability and performance.

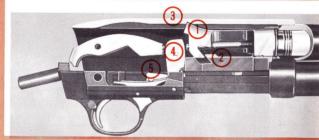

FEATHERLIGHT'S bottom ejection protects shooter and his partner—throws empty shells, gas, burned powder straight down: safer for right- or left-handed shooter. Also keeps out rain, sleet, snow, dirt to protect gun action.

This cutaway view shows the action of the Ithaca FEATHERLIGHT Repeater just as the shell leaves the magazine tube and is picked up by the carrier to be raised into position for entry into chamber.

Here the shell has been pushed from carrier into chamber by breech bolt. Back of bolt has started to rise into well at top of receiver—but hammer is mechanically blocked by slide from any chance of contact with firing pin.

With breech bolt positioned in retaining well, hammer is still mechanically blocked from any chance of touching firing pin. The gun cannot fire until breech bolt is pressure-seated in well—a most desirable safety factor.

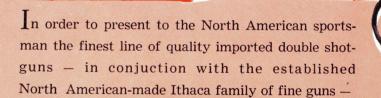

Final pre-firing position of action: Breech bolt is tight seated in well. Slide has freed hammer to strike firing pin, also supports bolt in well. Bolt now cannot leave well until slide is moved a quarter-inch to rear. Slide is locked in position by front projection of action release. This is strongest, most positive pump-gun locking system ever devised.

PARTS: Breech Bolt 5 Slide (Bolt Camming)
Locking Well Hammer Action Release

ITHACA Single Barrel Trap Guns

\$3000.00 GRADE EJECTOR (shown above)

Here's the ultimate in the craftsman's art. His finest effort, resulting in an arm that combines thoroughbred distinction with lifetime endurance. Made almost entirely by hand throughout, including shaping and fitting of steel, as well as woodworking. The ultimate in engraving, gold embossing and checkering. For the shooter who demands the finest, Ithaca creates the \$3000.00 Grade Single Barrel Trap Gun.

SPECIFICATIONS:

\$3000.00 GRADE EJECTOR

STOCK and FOREARM: Specially-selected walnut with handsome grain and color—hand-fitted and elaborately checkered with great artistry. The beavertail forearm, an Ithaca invention, fits the hand perfectly and keeps it away from the hot barrel.

> RIB: The rib is ventilated to prevent heat-wave annoyance, and matted on top to prevent reflection of sun's rays. It gives a clean line of sight, and cannot shoot loose.

ENGRAVING: No picture can do justice to the beautiful engraving on this gun. The frame, guard, forearm iron, trigger plate, top lever and breech block are elaborately engraved and ornamented in relief: Beautiful designs on the left and right side of the frame. Three precious metals are used in inlaying-green gold, yellow gold, and platinum. The trigger is triple-gold-plated and hand-checkered. Gold name plate in stock.

The No. 5E GRADE SINGLE BARREL TRAP GUN

STOCK and FOREARM: Extra-fine, carefully selected American Walnut of beautiful figure and coloring, hand checkered with beauty and artistry. Ithaca stocks are solid where they join the frame to prevent splitting, checking and spreading.

ENGRAVING: Frame, top lever, forearm iron, guard and trigger plate elaborately engraved with beautiful leaf and flower designs. Woodcock inlaid in gold on the right side of frame, pheasant on the left side. American eagle design on trigger plate and gold name plate in stock.

The No. 4E GRADE SINGLE BARREL TRAP GUN

STOCK AND FOREARM: Select, beautifully figured American walnut, carefully fitted, handsomely hand-checkered and finished.

ENGRAVING: Frame, top lever, guard and trigger plate hand-engraved in artistic manner. Trapshooting scene on one side of frame, American Indian shooting design on other side. Hardened, polished trigger, and gold name plate in the stock.

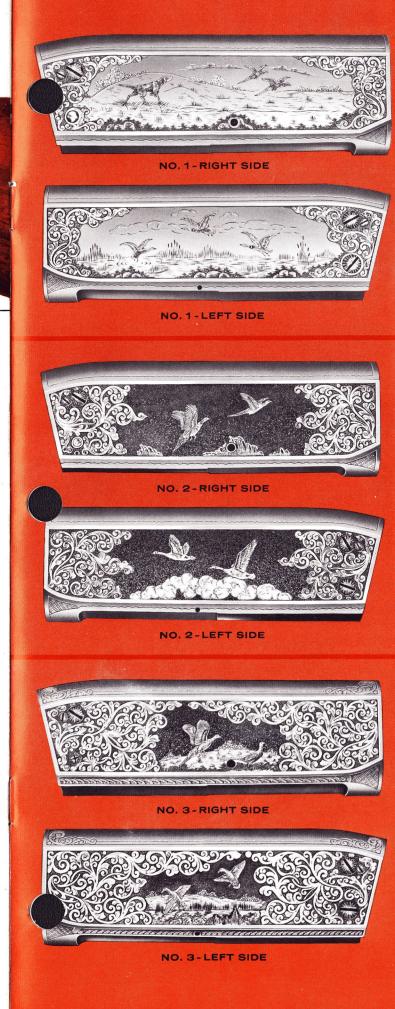

ADDITIONAL SPECIFICATIONS:

ITHACA LIGHTNING LOCK: All of our Single Barrel Trap Guns are equipped with the Ithaca Lightning Lock. Speedy, simple, smooth-working, snappy, this lock suits the trap shooter because he can break more targets with it. The Lightning Lock adds from 2% to 5% to your score for those targets that just won't wait for a slow load nor a slow lock. All Single Barrel Trap Guns have two lugs at the top, bolted at these points, on either side of the chamber.

RAYBAR® FRONT SIGHT: Exclusive with Ithaca. Ivory middle sight. Recoil pad. Full pistol grip, unless otherwise ordered. 30" or 32" barrel-twelve gauge only.

12

EXTREME STOCK DIMENSIONS: \$3000 Grade Ejector: No extra cost for special stock dimensions. 5E and 4E Grade Single Barrel Trap Guns: Monte Carlo, cheekpiece, cast-in or cast-off or combination available at extra cost. Reasonable deviation from standard stock dimensions (141/2" x 11/2" x 17/8") will be allowed without extra cost. If in doubt, request quotation.

ITHACA

Accessories & Services

Custom Engraving

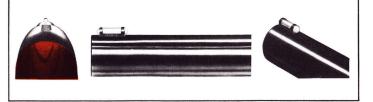

Illustrated at left are examples of the handsome ornamentation custom-engraved by the same Ithaca Master who creates the unexcelled \$3,000 Grade Repeater. Available to the discriminating shooter on special order in standard designs featuring hunting scenes, birds, dogs, floral and scroll, or the individual may submit his own sketches for quotation. Write for further details including quotations on special designs.

ITHACA Anti-Recoil Pad

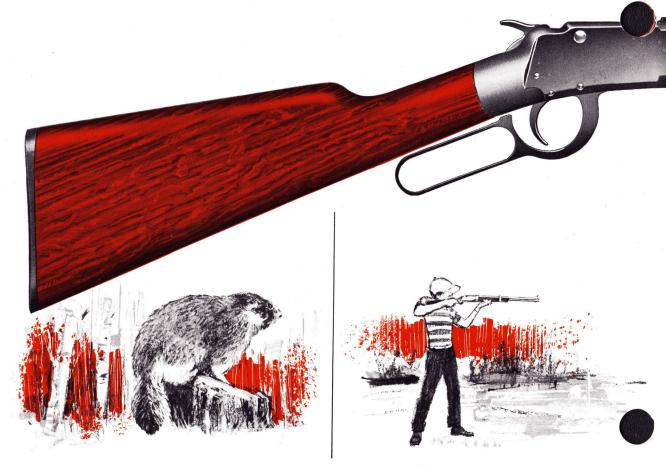

Highly shock-absorbent, this new design is firm through the center, but more resilient around the edges and at the toe, where most of the impact is usually felt. Available as a separate accessory item, it is standard on all Model 37D Deluxe and 37 Supreme Featherlights, and on Model 37 Deluxe and Super Deluxe Deerslayers.

Amazing Raybar® Front Sight

Gathers light rays by a definite scientific principle for hair-splitting accuracy under any shooting conditions . . . dawn, dusk, heavy overcast, rain, fog, etc. Furnished as standard accessory on all new Ithaca Repeaters and Ithaca Single Barrel Trap Guns. Sight easily mounted by your gunsmith.

ITHACA Model 49 Saddlegun

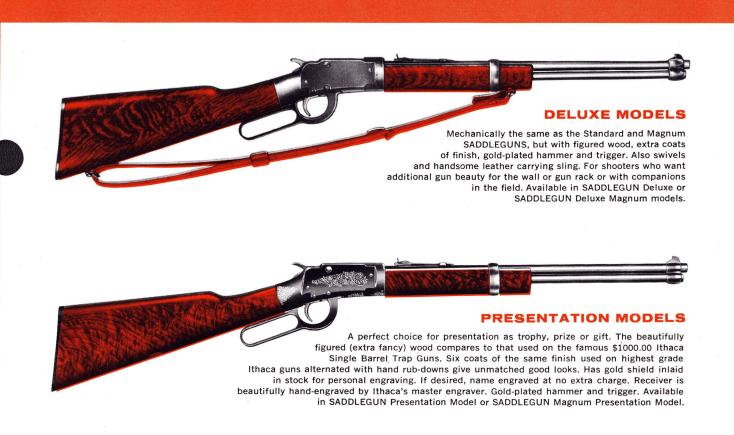

Since its introduction six years ago, the Saddlegun has not only captured the young shooters of our land: It has also become the favorite .22 of safety-minded parents and youth-oriented rifle training programs from coast to coast. The Saddlegun is accurate and safe: Its rebounding hammer is hand-operated, activated independently from the lever action. The gun cannot be fired unless the hammer is fully cocked by hand. This double safety factor makes the Saddlegun perfect as a boy's first gun. The solid steel barrel is 18" long and is precision-rifled. The Saddlegun is chambered for .22 short, long and long rifle cartridges. Its length is $34\frac{1}{2}$ ", and it weighs about $5\frac{1}{2}$ pounds. Shorter stocks are available for smaller boys at no extra cost. See the Gun Case page (inside back cover) for companion leather scabbards.

MODEL 49 SADDLEGUN MAGNUM

Same styling as regular SADDLEGUN except chambered for the .22 rimfire magnum cartridge only. An excellent gun for shooters who want greater range and plenty of "steam" for one-shot stopping of varmints and small game.

- North America's fastest-selling single-shot .22 rifle
- Styled after the gun that won the West... and has won the hearts of the nation's youth

Ithaca Owners Speak!

MAN-WIFE TEAM GO TO TOWN

with a day's harvest using a 16 gauge DEERSLAYER and a Model 49 SADDLEGUN. Note game variety:

Eight-point 208-pound buck taken at Spring Lake, Maine by F. L. King of Poughkeepsie, New York, with a DEERSLAYER. Mr. King reports his guides were amazed at

"The Deerslayer performed beautifully and was the choice of five of the six of us for an all-around woods gun. The shot pattern, with . . . 7½'s was adequate at 35 yards, with more than 100 shot printing within the 12" circle of a standard sight correction chart. Bad medicine for quail, grouse, woodcock or even turkeys. And as I said, the riflemen were convinced that they had better take a slug gun into the woods next season to put mean — furred or feathered — onto the table."

Mrs. Wayne Robison (left, above) of Hobart, Oklahoma, with ducks taken with 16 gauge DEERSLAYER. Her husband is shown with buck taken with same shotgun.

"It is simple to hit the kill zone of a silhouette target every shot at a range of 100 yards, and not too difficult to hit the silhouette at 200 yards."

— From article by Duke Roberts Rangemaster Gun World Magazine, testing
DEERSLAYER Riot Gun belonging to Los Angeles County Sheriff's Department

"Am very proud of my weapon, and it has given me very good service here in Alaska. On numerous occasions I have gone duck hunting in sub-zero weather. While crossing lakes my ITHACA has often became wet from water spray, the water freezing on the gun, but not once has it failed to fire . . ."

Sgt. Gerald D. Smith Seattle, Washington

"The Ithaca Model 49 SADDLEGUN is the nicest gun I have ever fired. Being in the Army, I have fired everything from the M1, M2 Carbine, 50 cal. Machine Gun, M14, and even the new AR15. To me and easiest to operate.'

Pfc. Danny J. Watkins Richards-Gebaur AFB, Missouri

"The Ithaca Model 37 (FEATHERLIGHT) is my favorite ... I have used it an average of three times per week during the hunting season (for 15 years) and week during the nunting season (for 15 years) and I have never had a misfire, nor has it ever 'jammed'. That is quite a record when you consider I've shot approximately 25-30,000 shells. As a result of its fine performance, I consider it, without a doubt, the best repeating shotgun on the market."

C. L. Fouts, Jr. Raleigh, North Carolina

"Let me say that it (Model 37 DEERSLAYER) is quite a gun, and it is the talk of the Club. This slug gun doubles quite well as a skeet gun. To date, shooting International style entirely, I broke any number of 20's, several 21's and 22's, and just recently got my first 25 using the slug gun. As I said, it's quite a piece!"

Robert E. Lee Ankara Rod & Gun Club

"My gun (Model 37 FEATHERLIGHT) has fired approximately 35,000 rounds under all conditions. The reliability of this gun is equal or superior to all guns in its class.

Jesse G. Oliver Lompoc, California

"For deer I get a 51/2" slug group at 100 yards (with the Model 66 SUPERSINGLE). It is one of the best investments I ever made. It's only a single-shot, but with a gun that shoots like that, who needs a second shot!

Levittown, New York

"I have never in my shooting life handled a gun that shot so accurately and handled so well for me. Thanks to all at Ithaca for making it possible for me to own a gun (Model 37R FEATHERLIGHT) that truly 'fits like a glove and shoots like a dream'.'

Michael E. Gray Guelph, Ontario, Canada

"I had never shot an Ithaca before this fall . In 7 full days in the field, I took 75 doves, 5 pheasants and 2 mallard ducks, In my area shots are not too frequent, and it is most important to make the first shot count. This is where my little Ithaca (Model 37 FEATHERLIGHT 20-gauge) proved its superiority . . . I wouldn't think of parting with

Justin J. Archuleta Albuquerque, New Mexico

"I believe your Model 37 to be the finest shotgun of its type in the world. I have used mine (Model 37R FEATHERLIGHT) exclusively since the model first hit the market and estimate I have taken a minimum of 6,500 game birds and busted many clay targets. I love your gun, gentlemen.'

Howard P. Ingels, Jr. Metairie, Louisiana

THE GUNSMITHS HAVE THEIR SAY!

"We have a large, well-equipped shop and draw gun repairs from a large area in which Ithaca Pump Guns are very popular. Much to my surprise, we have not repaired one Ithaca Pump Gun this season. This speaks well for Ithaca construction, as some pump guns are giving us a lot of trouble.

Kenneth A. Wright Wright Gun & Tool Co. Bloomsburg, Pennsylvania

"They (Ithaca Guns) seem to take a beating, yet stand up to hard usage and keep working. I honestly believe I've had less trouble with Ithaca Guns than any other make, and I'm the only Gunsmith in this town of approximately 120,000 . . . '

Varner's Gun Shop 207 Hawthorne Street Johnstown, Pennsylvania

"I have been in the gun business for over 60 years, and this is the first Ithaca to come into my shop. That's some recommendation for your gun."

A. Tornberg Gun & Lock Repairing Fix-it Shop

"I myself have never used anything but Ithaca Guns. Now I have a 12 gauge Ithaca Model 37 (FEATHER-LIGHT). I wouldn't sell it for five times what I paid for it, if I couldn't get another just like it. Your guns are tops in ruggedness and simplicity. The Model 37 fits me so perfectly and balances so well that it seems almost impossible to miss with it."

C. E. Darrow Darrow's Gun Shop 51 West Center Street Shavertown, Pennsylvania

ITHACA Featherlight® GUN CASES

No. 642 - Attractive black vinyl with white trim. Soft tan guncloth lining and 14" zipper opening. Padded, cradle-type handles and a heavy loop for hanging and storage. Lengths — 40", 42", 44", 46", 48", 50" and 52'

or the man who demands the distinction of unparalleled quality in his possessions, Ithaca creates the \$3000.00 Grade Repeater. The receiver alone represents eight weeks' artisanship in the finest engraving and 24K gold embossing. The inside presents every individual part hand-polished to an ice-slick surface.

ITHACA

Custom Crafted

\$3000.00

GRADE REPEATER

Obviously, only the finest steel and wood available are chosen for this masterwork.

STOCK AND FORE-ARM — The beautiful, fancy-figured, richlycolored walnut in the stock is selected from

Nature's choicest handiwork. The grip and beavertail forearm are full checkered by hand. Only our top Master Checkerer is allowed to apply his skills to these rare woods.

ACTION — Incredibly smooth, effortless action, fashioned from the finest steels, mirror-polished, and hand-fitted with painstaking care.

ENGRAVING — The custom engraving shown is entirely hand-wrought, even to the fine scroll and stippling used in the background of game scenes and to reduce glare at receiver top. Ducks and cattails are executed in gold bas-relief. Opposite side shows three magnificent ring-necked pheasants in full-flight.
